Special Note From Artist

*Explanation of Submission #4:* This is an interactive piece, where each of the squares seen can be pulled off the frame and moved or rotated to what the viewer likes best. I want the viewer to feel as if he or she is creating their own masterpiece from my own masterpiece. I believe this interactive piece makes art more collaborative and inventive since each person that gets to see this piece can leave their "mark". In this sense, the viewer becomes the artist.
