

Specialized Treatment Programs:

- Flexible Endoscopic Evaluation of Swallowing (FEES)
 - Biofeedback measure to support effectiveness during therapy
- McNeil Dysphagia Therapy Program (MDTP)
 - “Systematically organizes swallowing activities using exercise physiology principles” (Florida Dysphagia Institute, 2021)
- AEIOU Approach to Pediatric Feeding
 - “Integrates five factors of feeding and mealtime that increase the quality of the child’s participation within his/her family in the context of family-centered care” (Johnson, N. 2010)
- Lee Silverman Voice Treatment (LSVT)
 - Used to support individuals’ vocal quality and loudness, typically Parkinson’s patients
- SPELL-Links to Reading & Writing
 - Explicit instruction and practice with multiple linguistic strategies for spelling and decoding designed to improve overall reading and writing skills
- Aural Rehabilitation
 - Intervention aimed at minimizing and alleviating the communication difficulties associated with hearing loss
- Aphasia Support Group
